

Test name	HYPERTROPHIC CARDIOMYOPATHY (HCM) - MAINE COON (A31P)
Swab Number	136135
Animal Number	26442

Owner/Breeder	
Name	Zuzana Zakova
Address	Podhraz 11, Holice CZECH REPUBLIC Czech Republic, 53401.

Animal Details	
Name	Langstteich's La-Bohème
Sex	Male
Breed	Maine Coon
Registration No. ID	
Microchip No.	276098106237329

Specimen Type	BUCCAL CELLS
Date Received	18/01/2017 1:33:15 PM

Test Result	Clear
Interpretation	<p>The specific HCM mutation is not present. This test identifies the most common mutation currently known to cause HCM in Maine Coon cats. It identifies a mutation in the MYBPC3 gene as described by Meurs et al.</p> <p>If the mutation is not present, it does not mean that the cat will never develop HCM, as other causes are possible. A "Clear" result means that the cat's DNA does not contain this specific mutation.</p> <p>In breeds other than Maine Coon, a positive result indicates that the cat has the specific mutation.</p> <p>Reference: Meurs et al. Human Molecular Genetics 2005, 14, 3587</p>

Date of report: 11 August 2017
